PROFESSIONAL EXPERIENCE

Hexava Studio

February 2026 – Present

Lead Unity Developer

- Focused on developing mobile puzzles with pleasant satisfaction and deep meta-mechanics
- Developed creatives and meta-mechanics that improved product metrics (CPI, retention, playtime) by 20%
- Developed and supported a basic template project for the team
- Integrated AI tools into the development process (Codex). Increased development speed by 30%. Created some puzzle levels using AI tools

Starsplay Team

July 2025 – February 2026

Middle-Lead Unity Developer

- Focused on rapid prototyping of 2D PvP/PvE mobile games. Developed asynchronous and turn-based battles using the UniTask. Created fake online bots
- Improved game performance with a large number of units by 30% using mesh animations and agents navigation system
- Helped adapt and trained a new developer
- Implemented user interfaces from mockups. Created satisfying animations using a DOTween (later a PrimeTween)
- Integrated SDK, Ads and IAP for “Voodoo” and “Lion Studios” publishers

Panda Play

June 2023 – July 2025

Middle Unity Developer

- Focused on developing mobile games of various genres and complexity
- Supported a game with over 5 million downloads. Reduced this game loading time by 70% and optimized the build size by 30% using Addressables and Sprite Atlases
- Developed different tools and configs for game designers and artists to make their work easier and faster
- Integrated SDK, Ads and IAP for “SayGames”, “AZUR GAMES” and “Homa” publishers

Square Way

April 2022 – June 2023

Junior Unity Developer

- Assisted in the development of game mechanics for mobile IO games. Developed tutorials
- Learned the fundamentals of mobile game development. Learned the principles of building clean application architecture. Used DI containers (Zenject, later a VContainer)
- Worked with various external assets and packages
- Debugged early-stage prototypes, identifying bugs and issues

EDUCATION

Belarusian National Technical University

September 2019 – June 2023

Software engineer, Information systems and technologies

- Developed two course projects and a diploma thesis using Unity and C#
- Average grade: 9

PERSONAL PROJECTS

- Developed personal mobile and computer games with friends in my free time. Presented this at exhibitions and conferences
